AGRICULTURE AND FOOD VENTURES IN MANITOBA

2001-2002 DIRECTORY

Manitoba
Agriculture
and Food

This directory is the result of a comprehensive survey of agri-business that was carried out in the fall of 2000. The information is printed as given. It is the responsibility of the persons using the directory to obtain additional information regarding specific business licensing, inspection and food safety standards where applicable.

102-00109/

HONOURABLE ROSANN WOWCHUK
MINISTER OF AGRICULTURE AND FOOD

I am pleased to present the 2000-2001 Directory of Agriculture and Food Ventures in Manitoba.

This directory, compiled by Manitoba Agriculture and Food, is a listing of agri-businesses engaged in the value-added production of agricultural goods and services. In these pages you will find a complete listing of the many creative and progressive individuals currently finding ways to add value to a wide range of Manitoba's agricultural products.

Strengthening Manitoba's position in the agricultural marketplace is a key element of my department's vision for the future. I believe that value-added processing and diversification play major roles in achieving our goal.

Manitoba's central location and our strong transportation links are tremendous advantages to our agri-food customers. And these are just two of the many advantages you will find in Manitoba's sustainable, socially responsible and economically important agri-industry.

I encourage you to discover the many advantages of doing business with Manitoba agri-business companies. To learn more about how to profit from this partnership, please see the list of resources at the back of this Directory, contact the Food Development Centre or the Marketing and Farm Business Management Branch of Manitoba Agriculture and Food.

Manitoba Agriculture and Food recognizes the need for farmers to make "whole farm" decisions incorporating production, financing, marketing and human resources.

The Marketing and Farm Business Management Branch provides an integrated marketing and farm management approach to service clients, families, industry and staff. These steps ensure the department's contribution to the success of Manitoba's food and agriculture sector.

MARKET DEVELOPMENT AND PROMOTION

The Market Development and Promotion Section provides advice and guidance to producers and processors interested in exploring opportunities or increasing existing sales to markets in the United States, Eastern and Western Europe, Middle East and others.

The section provides guidance to active exporters and new export-ready companies to develop marketing plans and business strategies. Services include assistance to incoming and outgoing trade missions.

The section facilitates the establishment of integrated alliances and collaborative interactions in industry-driven market development and investment to generate long-term stability and growth. Staff assist in developing information to assess market potential for development and commercialization of agri-business enterprises.

In addition, staff responsibilities include the development and delivery of market-oriented initiatives, promotional materials and participation in trade events to strengthen industry profile. Staff support industry marketing efforts to increase international awareness and consumption of Manitoba grown products.

For more information, please contact the Market Development and Promotion Section at 1-204-945-4491.

AGRI-VENTURES

The mandate of the Agri-Ventures Section is to strengthen the competitive position of Manitoba's agricultural industry by increasing opportunities for economic activity in the production and marketing of value-added and diversified agricultural products.

In conjunction with regional Agri-Ventures Specialists, the section provides pathfinding services, technology transfer and general consulting in:

- industry development
- business development
- business plan/feasibility study review, and
- marketing of value-added agricultural products

Areas of technical support include alternative crops, alternative livestock, agricultural product manufacturing, food processing and agri-tourism.

For additional information, please contact the Agri-Ventures Section at 1-204-945-3498.

HOME ECONOMICS

The mandate of the Home Economics Section is to provide leadership and resources that help rural Manitoba families achieve their goals. The section provides programming and assistance in the areas of:

- developing a food or fibre product
- developing a micro home-based business
- promoting Manitoba's agricultural food products and industry
- identifying important consumer trends and issues
- managing personal family finances
- improving personal, family and business relationships

For more information, contact the Home Economics Section at 1-204-945-8565.

INTERNATIONAL TRADE

The mandate of the International Trade Section is to investigate trade opportunities and establish a recognized presence for Manitoba agricultural products in the Asian, Mexican and Latin American markets.

The section provides assistance in identifying trade opportunities and qualifying trade prospects, facilitating direct contact between suppliers and buyers through incoming and outgoing missions.

Staff work in partnership with industry stakeholders to undertake trade initiatives aimed at increasing net exports of agriculture commodities, with particular emphasis on value-added products to establish an expanded or new presence in the international marketplace.

For more information, please contact the International Trade Section at 1-204-945-4529.

FARM MANAGEMENT

The mandate of the Farm Management Section is to provide leadership and cooperation in farm business management.

Their role is to develop and deliver resource material and provide training in the following areas: marketing – crops and livestock, cost of production and financial accounting, analysis and planning.

For more information, contact the Farm Management Section at 1-204-945-4937.

AGRICULTURAL SOCIETIES/ AGRICULTURE CURRICULUM

The mandate of the Agricultural Societies program is to provide leadership and resources to volunteers who oversee the activities of the sixty-two agricultural societies organized under the Agricultural Societies Act.

Staff role is to update and distribute information related to agriculture, horticulture and home living skills, as well as to provide administrative support for the program.

If you require additional information please contact the Agricultural Societies Section at 1-204-945-4593.

4-H & YOUTH

The mandate of the 4-H & Youth Section is to provide a positive skill and leadership development opportunity for rural youth and adults.

Their role is the overall coordination of the Manitoba 4-H program. In conjunction with the regional 4-H & Youth Specialists and within the framework of policies developed by the Manitoba 4-H Council, the section:

- implements provincial conferences, programs, and communication and leadership development events
- provides project material for 4-H members and leaders.

For more information contact the 4-H Section at 1-204-945-4525.

There are a number of funds available to individuals who are working through the process of developing their business. Various funds make monies available for the development of business plans, product development, market development and marketing plans, and capital expenditures.

MANITOBA AGRI-VENTURES INITIATIVE (MAVI) MANITOBA AGRICULTURE AND FOOD

Purpose of Fund:

To help establish proven, new or unique value-added production and processing ventures in agriculture and food, and maximize new opportunities in expanded uses and developing new markets for Manitoba's agricultural commodities.

Planning assistance is available for the development of information for:

- business plans, marketing plans, feasibility studies
- new product development, new processes development, market development

Project Assessment:

Eligible projects include value-added food processing and new uses manufacturing utilizing agricultural commodities produced in Manitoba.

Funding:

Projects are cost shared on a 50-50 basis.

Contact:

Call the nearest Manitoba Agriculture and Food Office or regional Agri-Ventures Specialist or:

Rachel Bosc, Manager,
Agri-Ventures Section
Manitoba Agriculture and Food
903 – 401 York Avenue
Winnipeg MB R3C 0P8
Phone:204-945-3498
Fax: 204-945-6134

FOOD DEVELOPMENT CENTRE

The Food Development Centre provides technical assistance and consulting services to existing food industries. It also stimulates the creation of new food processing opportunities in Canada.

The centre's food technology operation is funded by fees charged for services and by the Government of Manitoba. Staff work closely with researchers at the University of Manitoba and other facilities to ensure the full technical resources of the province are available to the clients.

The centre provides assistance to industry in the areas of: food product development; food packaging; food evaluation and testing; and food information and advisory services. For small and medium-sized firms, these services represent a cost-efficient opportunity to use sophisticated technical and informational resources. Larger firms also use food technology services to compliment their own in-house testing facilities and to verify their own test results.

Specific areas of expertise include: recipe development; sensory evaluation; consumer acceptance studies; shelf-life studies; nutritional evaluation; development of quality control and sanitation programs; pesticide residue detection; custom processing; and co-packing.

To support product/process development services, the Food Development Centre's 2,000 square-metre facility has laboratories that provide chemical and microbiological analysis of raw materials and finished products. A fully operational pilot plant also gives companies the unique opportunity to go into pilot-scale production for test marketing, without the required capital investment.

From the inception of a contact research project to completion, the client works one-on-one with a designated project leader. Budgets and other project parameters (time allocation, methodology, reporting and deliverables) are clearly outlined to the client before the project is initiated. Staff is well positioned to assist clients in obtaining financial assistance to help defray project costs for eligible projects.

All aspects of the client-consultant relationship are held in strict confidence.

RURAL ECONOMIC DEVELOPMENT INITIATIVE (REDI) MANITOBA INTERGOVERNMENTAL AFFAIRS

Purpose:

Manitoba Intergovernmental Affairs offers several programs and services that help Manitobans reach their economic potential by building on traditional strengths and focusing on new opportunities. As the department's major economic development programs, the Rural Economic Development Initiative (REDI) program and the Grow Bonds program focus on developments that have long-term economic benefits.

- **Rural Junior Achievement**

Through Rural Junior Achievement, the province provides funding to Junior Achievement of Manitoba Inc. for the delivery of Junior Achievement programs

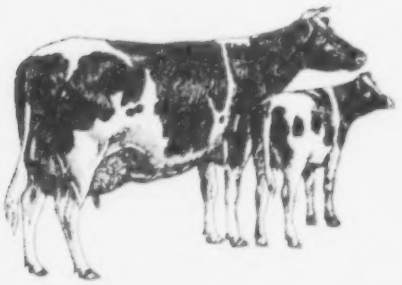
to rural Manitoba elementary and high schools. Each program is delivered on a semester basis with each school eligible to receive two programs per year on a cost-shared basis. Junior Achievement of Manitoba Inc. provides all program material and identifies and recruits local business person/teacher teams responsible for program delivery in the classroom and provides them with a comprehensive training program.

- **Partners With Youth Program**

REDI assists with funding the rural component of the Partners With Youth Program which is administered by Manitoba Education, Training and Youth. The program provides wage incentives to employers who can offer entry level career positions to young Manitobans. Applicant employers must be able to demonstrate that the jobs will be ongoing and will continue on a full-time basis past the wage incentive period. The positions must provide a minimum of 25 hours of work per week. Employee candidates must be between 16 and 24 years old and must be recent graduates or unemployed youth. A graduated wage incentive is available to businesses, institutions, and community/non-profit organizations for a period of 12 to 26 weeks. Under the Young Entrepreneur Support component, a matching grant of up to $4,000 is also available to youth, between 18 and 29 years old who want to establish a new full-time year-round business venture.

- **Green Team Program**

The Green Team Program provides summer employment for rural Manitoba youth, 16 to 24 years of age. The program has two components. The ***Natural Resources Green Team*** provides youth employment in provincial parks to undertake park infrastructure and maintenance, interpretive services, tourism promotion and other conservation and visitor-oriented tasks. The ***Hometown Green Team***, assists municipalities, local non-profit groups and organizations and tourist operators in hiring youth to improve local community park facilities and undertake other outdoor summer jobs in their community.



- **Feasibility Studies Program**

The Feasibility Studies Program assists rural business to access reliable research and planning for potential new or expanding business projects. REDI can provide up to 50 per cent cost-shared funding to hire an independent consultant for a financial, marketing or engineering analysis and/or development of a business plan. Projects are approved by the REDI office and upon completion of the study, the applicant must provide the REDI office with a copy of the consultant's completed report, a short letter from the applicant commenting on the study service provided, and copies of all receipted invoices indicating payment in full. Once these conditions have been met, the approved cost-sharing is then paid to the applicant.

- **Infrastructure Development Program**

The Infrastucture Development Program assists communities to improve sewer, water and energy services, transportation access, waste disposal facilities, telecommunications, etc., specifically designed to service new or expanding businesses. Economic development organizations and local government authorities can apply for assistance. The infrastructure developed through this program must be owned and controlled by the applicant authority. Eligible projects are funded on a 50/50 matching basis for off-site project costs to a maximum of $100,000 or $500,000 if the infrastructure improvement provides a regional service.

- **Community Works Loans Program**

The Community Works Loans Program operates as a revolving loan pool that makes community-based loans available to small businesses in rural and Northern Manitoba. A local Community Development Corporation (CDC) raises between $10,000 and $25,000 in order to qualify for matched two-to-one funding by the province. Tapping into this pool of funds, approved clients can receive loans of up to $10,000 at competitive interest rates to help them start or expand a business. Clients repay the loan in regular installments, as they would do to any financial institution. Repaid capital is then lent out to other clients. Interest earnings from the loans are retained by each CDC to cover administrative costs and to further capitalize the loan fund.

- **Rural Entrepreneurial Assistance (REA)**

Under the REA Program, the province provides loan guarantees for business loans between $10,000 and $100,000 to new or expanding, full-time, small and home-based businesses in rural Manitoba. The loans are offered and administered by participating banks and credit unions for five year terms at an interest rate of prime + 1 per cent. The client must contribute 20 per cent of total project costs in the form of a cash contribution, land, buildings, equipment, inventory and/or incremental assets that will be used in the business. The loans are not intended to be used for operating lines of credit, refinancing or to purchase an existing business, unless the business has ceased to operate for at least 60 days prior to the proposed purchase. Every REA applicant must attend a business seminar before loan funds are released. A voluntary mentorship service is also available upon request. Participating financial institutions will process, approve, disburse and administer the REA loans. Any costs associated with drawing up loans and security papers are to be borne by the applicant.

- **Grow Bonds**

Grow Bonds give Manitobans the opportunity to participate directly in strengthening local economies and creating job opportunities. Under provisions of the Community Development Bond Act, communities plan and manage bond offerings to raise capital which is used to finance eligible business opportunities and expansions. Activities are managed through local development bond corporations which market the bond issues, make project investments in new or expanding local businesses and keep investors informed about on-going activities. Only Manitoba residents and corporations are eligible to purchase Grow Bonds and bondholders have voting rights in the bond corporations. Grow Bonds are available in denominations of $100, limited to individuals purchases of $50,000 or 10 per cent of an issue, whichever is less, for a five-year term.

The Government of Manitoba guarantees the bond principal. Grow Bonds work in the following manner:

- The project company presents a business plan and project application to the Grow Bonds Office.
- Analysts review and assess the viability of the project.
- Upon approval, a Development Bond Corporation is formed, Grow Bonds are offered for sale.
- Grow Bond money is invested in the approved business (investment is limited to 40 per cent of total capital).

Eligibility

Programs and services are available to applicants in the province of Manitoba.

Contact:

Information is available from all Community Economic Development Services offices across Manitoba or call 1-800-567-REDI (7334).

AGRI-FOOD INDUSTRY MARKET STRATEGIES (AIMS)

Agriculture and Agri-Food Canada, Foreign Affairs and International Trade Canada, and Western Economic Diversification Canada

Purpose of Fund:

To assist Canadian agri-food associations in developing effective export marketing strategies.

Strategies generally include: forecasting market demand and setting priorities, evaluating industry capabilities, setting long-term goals for target markets, description of plan to achieve strategies, and assessment of impact and result of activities.

Project Assessment:

Assessment is done on an individual project basis.

Funding:

Projects are cost-shared with industry associations.

Eligibility:

National associations with a desire to develop an export strategy. Some considerations may be given to regional organizations.

Contact:

Fay Abizadeh, Deputy Director
Market Development & Analysis
Market and Industry Services Branch
Agriculture and Agri-Food Canada
402 – 303 Main Street

Phone: 204-983-8622
Fax: 204-983-4583

AGRI-FOOD TRADE 2000 AGRICULTURE AND AGRI-FOOD CANADA

Purpose of Fund:

To assist the Canadian agri-food industry to increase sales of agriculture, food and beverage products in global markets.

Project Assessment:

Assessment is done on an individual project basis.

Funding:

Projects are cost-shared with industry associations.

Eligibility:

Projects must have the potential to have significant impact on sales of Canadian agriculture, food and beverage products. Priority will be given to projects within target export market. Projects should be part of long-term industry strategies through agri-food industry associations or alliances representing a significant portion of industry. Project should have the potential to provide public benefits like job creation and income generation for Canadians.

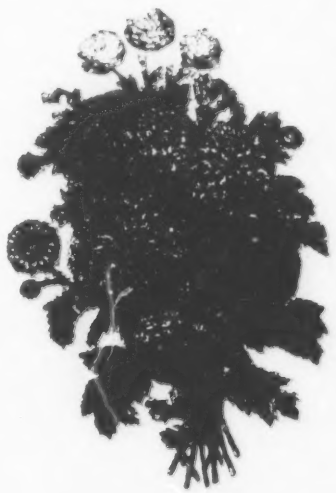
PROGRAM FOR EXPORT MARKET DEVELOPMENT (PEMD)

Managed by Foreign Affairs and International Trade Canada and jointly implemented with Industry Canada.

Purpose & Funding:

To increase export sales of goods and services by cost and risk-sharing with Canadian companies interested in foreign markets they are not able to enter on their own.

- Marketing Development Strategies support a package of visits, trade fairs and marketing support initiatives based on a company's one or two-year international marketing plan. Funding ranges from $5,000 to $100,000/year based on a 50/50 shared basis. Eligible costs include return economy international airfare to visit the market or have a foreign buyer visit the company Canadian facilities; trade fairs, product testing by foreign standards agencies for market certification, legal fees for marketing agreements abroad, labeling/label compliance, product demonstrations, cost and promotional material specifically designed for the target market.
- New-to-Exporting Companies program provides resources for companies seeking export opportunities through a market identification visit or participation at an international trade fair. Funding maximum of $7,500 per application (limited to one approval per 12 month period). Eligible costs include up to 50 per cent of: transportation costs for an approved market identification visit



◆

and/or costs of participation in an international trade fair outside Canada. Only one approval per market is allowed.

- Capital Projects Bidding provides support for Canadian firms bidding or preparing proposals at the pre-contractual stage for capital projects outside Canada. Bids are for the supply of Canadian goods and services such as engineering, construction, architecture and management consulting. The program is not designed for the establishment of foreign joint ventures.

  Contributions range from a minimum of $5,000 to a maximum of $50,000. Eligible costs include per diem allowances for international travel for bid preparation, 50 per cent of return economy international airfare and arms length preparation costs (printing, computer, legal fees, translation fees, obtaining bids, consultant fees). There must be foreign competition and there cannot be any Canadian competition for the project.

- Trade Association Activities provide assistance for sector-specific, non-sales trade associations and major or national horizontal trade association. Activities must benefit members and can include generic promotion of products or services. Project focus must be on developing or increasing sales of Canadian goods or services in foreign markets. There is a minimum of $15,000 to a maximum of $100,000.

Project Assessment:

Companies must be "export prepared"; activity must fit company's marketing plan; activity must be unlikely to be undertaken without PEMD support; applicant must contribute at least 50 per cent of costs from own funds and must not be receiving funding from any other federal or provincial sources.

Eligibility:

Support is available to incorporated businesses, independent firms of professionals and national trade or industry associations. Preference will be given to companies with annual sales between $250,000 and $10 million and/or with fewer than 100 employees (manufacturing) or 50 (service).

WESTERN ECONOMIC DIVERSIFICATION CANADA (WD) GOVERNMENT OF CANADA

Purpose of Fund:

The department of Western Economic Diversification promotes the development and diversification of the economy of western Canada and advances the interests of western Canada in national economic policy. Together with western provincial governments and industry groups, WD works to provide small businesses with information and assistance to help them grow and prosper. Products and services are delivered to small businesses through an integrated network of some 90 points of service across the west and include Community Futures Development Corporations, the Women's Enterprise Centres, Canada Business Service Centres and Western Economic Diversification offices.

Eligibility:

Small and medium sized business located in Western Canada.

Criteria: While WD no longer provides direct financial assistance to individual companies, it provides a range of other programs and services. For example, WD has established innovative financial partnerships with a number of financial institutions which offer loans of up to $500,000 to small and medium sized businesses. Loan programs are targeted at specific industry sectors, and currently include information and telecommunications technology, tourism, knowledge and growth based industries and agricultural value-added processing.

Type of Assistance:

- Access to capital through a series of specialized loan funds, noted above. Loans are repayable at commercial rates of interest for companies in specific industry sectors and are offered on "patient terms" which allow up to 7 years for repayment and permit the delay of interest and principal for up to two-thirds through the term.
- Wage assistance programs to assist companies in hiring recent graduates to work on expanding sales in international markets (International Trade Personnel program) or introducing new technology to a firm (First Jobs in Science & Technology program).
- Business support services such as business planning and development, advice on entering export markets, assistance in entering government procurement markets, pathfinding services to other government programs and services.
- Community Futures Development Corporations help focus local economic planning activities and provide business services to entrepreneurs. They also offer business counselling, training and access to loans.

INDUSTRIAL RESEARCH ASSISTANCE PROGRAM (IRAP) NATIONAL RESEARCH COUNCIL

Purpose of Fund:

National Research Council assists manufacturing, resource, construction and service industries.

Technology Enhancement Projects (projects less than $15,000)

Small and medium size companies (up to 500 employees) and industrial associations desiring to enhance their technological capability are eligible for support. Eligible activities include: technical feasibility studies; small scale R & D; short-term or small-scale technical assistance by an organization external to the company; technical analysis and problem solving by consultants and sub-contractors; projects or problem-solving utilizing

a university or college level engineering or science student; visits to NRC or other government department laboratories, or to provincial research organization or university laboratories; technology transfer to industrial associations; and links of small firms to large ones. IRAP will cover up to 50 per cent of the eligible project costs.

Research, Development and Adaptation Projects (Projects over $15,000)

Small and medium size companies (primarily up to 500 employees) are provided with technical and financial assistance in advancing unproven technology to the point of performance testing and the various validation stages prior to commercialization. Criteria for support are novelty, technical capability. Prime consideration is given to the likelihood that the project will profitably improve the technology base of the firm, lead to industrial development and commercial exploitation in Canada and assist the firm in international markets.

IRAP will provide support of $15,000 to $250,000, covering up to 24 months. IRAP's share of the costs of the project is not to exceed 50 per cent. The applicant is to contribute at least 25 per cent. The company's share will exclude research and development Tax Credits, which really are part of the government contribution.

Project Assessment:

Assessment is done on an individual project basis.

Funding:

See individual programs listed above.

Eligibility:

See individual programs listed above.

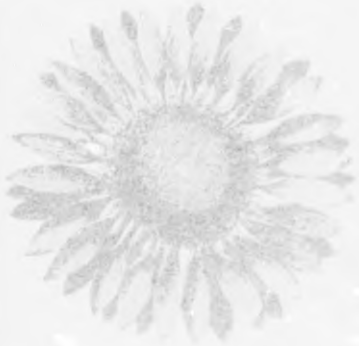
ARE YOU AN AGRICULTURALLY BASED BUSINESS?
DON'T MISS OUT!!!

This directory is revised annually to showcase Manitoba agricultural products, services and businesses. The 2002 directory "Agriculture and Food Ventures in Manitoba" will help you to promote your product(s)/service(s).



DOES YOUR BUSINESS QUALIFY?

Business must be run and operated in Manitoba.
Business must use Manitoba-grown or produced agricultural commodities.
Only unique agricultural products and services to be included.

If you are not currently listed in this 2001 directory, simply fill out the form below and mail to **903 - 401 York Avenue** or fax to **1-204-945-6134.** This will ensure that your business will be included on our database. This information will be verified closer to the publication of the directory. The entire Agriculture and Food Ventures 2001 Directory is listed on the Internet under the Manitoba Agriculture and Food home page: http://www.gov.mb.ca/agriculture/.

AGRICULTURE AND FOOD VENTURES IN MANITOBA FORM

Information will be included exactly as given. Please print clearly in ink.

1. Name and address of business (please include postal code)
